Experience / Projects

"Pokedex" Front-End Project

React, PokeAPI, Heroku - www.timpokedex.herokuapp.com

- I completed this front-end project to test and improve my user interface skills.
- Includes double-sided card components created from scratch that rotate on hover.
- Utilizes "PokeAPI" API to add new Pokemon cards.

"Brain" Full-Stack Project

React, Express.js, Node.js, PostgreSQL - www.timbrain.herokuapp.com

- I completed this full-stack project to greater understand the concepts of full-stack web development. I learn best through doing.
- Uses an API to detect a face in a given photo.
- Secure user registration system, stores hashed passwords using "bcrypt".

EBIDM Triage - Shared Services Canada (Ottawa, ON - remote from St. John's, NL)

Student | July 2018 - Present

- My duties are to review and action various business requests. Process included ensuring completeness of documentation, determining course of action based on the nature of the request, and moving forward each request based on its own unique requirements.
- Hired for Summer 2018, rehired each following semester and for Summer 2019
